REMARKS

25X1

25X1

1. The Grossenhain (N 52/A 01) airfield was occupied by jet fighters with swept-back wings on 9 August 1950.

Some jet fighters were in the air. No conventional fighters were seen. The planes took off individually or in elements of two and made local flights. *

2. A radio truck with two antennas and seven fuel trucks were at the take-off point beside the runway. Electric power was produced by a generator.

* Comment. The occupation of the field by jet planes has often been reported. it is believed that a minimum of 37 jet planes are stationed at the field. However, it is probable that the total occupation by jet planes is higher. To date, two fighter regiments have been believed to be at the field.
